SOTERIA SOLUTIONS

VISITOR MANAGEMENT SOLUTIONS

VISITOR MANAGEMENT

Soteria Solutions' Visitor Management System delivers real-time authentication for visitor data, including vehicle and driver's licenses, all while keeping you fully compliant with POPIA regulations. Think of it as your digital bouncer—making sure no one gets past the velvet rope without proper ID! Our customizable Handheld Visitor Access Control system ensures a smooth experience for visitors, employees, and management alike, prioritising the security of your people and data with efficiency and ease.

- Scan the visitors South African Vehicle License disk
- License, ID, or QR Code Scanning and Authentication
- Select destination and you're done
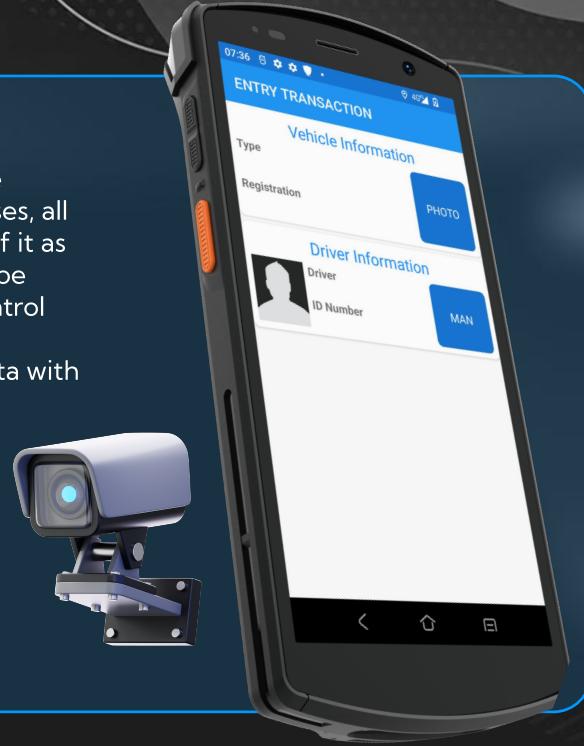

AT RECEPTION

The Soteria Pre-Registration Visitor Management System is a streamlined, user-friendly platform designed to enhance security and efficiency for organizations by managing visitor access prior to their arrival. This system simplifies the check-in process, reduces wait times, and ensures that all necessary information is collected and verified before visitors arrive at your location.

AT WAREHOUSE

Optimise your warehouse operations with **The Soteria Scanner.** Seamlessly track every stage of your process—from packing to dispatch—ensuring accuracy and efficiency. Our advanced system links each step, verifies each action, and matches delivery notes and manifests to the corresponding truck and driver.

Monitor turnaround times effortlessly, from the moment items are packed to their departure with a truck. With The Soteria Scanner, enhance your warehouse management with precise tracking, real-time verification, and comprehensive visibility.
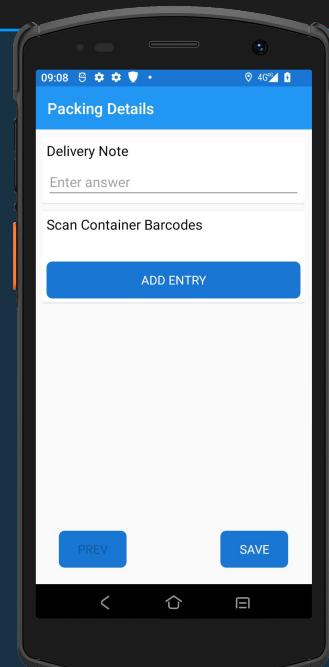

PATROLS

The Soteria Patrol System is an advanced mobile solution designed to optimize security and monitoring through real-time tracking and verification of patrol routes. Leveraging RFID (Radio-Frequency Identification) tags as patrol points, this system enhances the efficiency and accountability of security personnel by ensuring that all designated locations are visited and logged accurately.

OCCURENCE BOOK
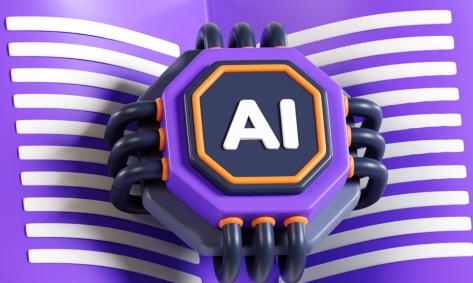

The Soteria Occurrence Book is best characterised as a comprehensive application. It is highly efficient for recording and managing occurrence data in any setting where traditional manual occurrence books are typically employed. This includes security operations and centralised control rooms that oversee multiple client sites.

EVENT MANAGEMENT

Transform your event management with our advanced **Visitor Management Platform.** Simplify the process from start to finish: send out invitations, collect guest information seamlessly, and streamline check-ins. Upon arrival, guests receive a personalized Guest Sticker, which can be easily printed on-site.

SOTERIA TENANT APP

Enhance security and streamline visitor management with our flexible PIN system. Choose between a one-time use PIN or a reusable PIN to control access to your estate, ensuring only authorised guests enter. As a Manager, you'll have full visibility of visitor movements, providing peace of mind in case of emergencies.
